Dorothyshire

Conference on highaltitude paleobiology, May 16.

Dear George:

At least tentatively, we have arranged that Monday, May 16 will be satisfactory for our meeting, and I suggest that you proceed with notices to the exobiologists on that basis; my verification with Mel Calvin was through his secretary, but I am sending a copy of this to him and he will doubtless call you if there is some hitch.

I suggest then that we meet from 10:30 - 4:30 (to accomodate the counters). I hope we can get the Medical School Faculty Room again; in any case, the secretary in the dean's office will know where to go. I suggest that the visitors check in at around 10:00 AM; I can meet them there.

Please let me know your final registration list and requirements for any projection equipment. If there is any substantial need for this, we will probably find a more suitable room nearby.

I am ~~amusing~~ counting at minimum on General Flickinger and two AF people in photographic interpretation; Harry Waxler; Mel Calvin; Harold Weaver; myself. I will also ask Mike Villard. I would not press you to make the long hop again yourself, but leave it to you whether you feel you can or should.

I am leaving for Lond on either Friday or Sunday, and assume that Porter has had no response to his letter to Elagoravov. I can be reached at the Ciba Foundation, 41 Portland Place, W. 1 (cable Cibafound, Wesde, London; phone MUSEum 9456) if you have late news on this. I should be back about the 20-22d, in time for the belated trip with Stanier and Imshenetzki.

Bestily

Joshua Lederberg
